### **EXPERIENCE**

### Microsoft, Redmond, WA

May 2019 to August 2019

Software Engineer Intern

- Developed in the C# and .NET environment on <u>Azure's Active Directory</u>, a cloud-based service responsible for managing user identities, access management, and devices.
- Solved a major customer complaint regarding the loss of private BitLocker key data by refactoring API calls and architecting an additional external storage model to decouple the lifetime of two data objects.
- Changed the intrinsic way that the Microsoft Mezzo storage service operates by altering their data synchronization service to sync data objects with a one-to-many instead of a one-to-one relationship.

#### Ultimate Software, Weston, FL

May 2018 to August 2018

Software Engineer Intern

- Developed and tested in C# within the ASP.NET framework in a Kanban-Agile environment on <u>UTE</u> (UltiPro Tax Engine), responsible for the collection of over 13,000 tax codes.
- Implemented Grafana dashboard to diagnose performance issues with generation and calculation of tax forms in order to better serve users.
